- I. The Contract will be based on the content of the Contracting Documents.
- II. Within the Specifications certain Products or work methods may be referenced by a Manufacturer brand, a common trade name or common work practice. Where such references are made these are to convey to Contractors the City's minimum standard (or benchmark) of acceptable Work. Proposed equivalent Products, meaning from another Manufacturer, or, proposed alternative work methods may be considered by the City as acceptable equivalents, provided that the technical properties of the Product substitutions or the outcome of the proposed alternative work method can be demonstrated as being equivalent to those set forth in the Contract Document Specifications. Moreover where substantive compliance of the Evaluation Method can be demonstrated, substitute Products or alternative methods will be accepted by the City.
- III. Should the proposed equivalent be rejected by the City, the bid will be deemed non-compliant and will not be considered for contract award. The cost of any testing requirements to establish acceptable equivalent or comparable products will be borne by the Contractor, unless otherwise stated by the City.

The Specifications provided in this Document are the minimum required to cover the smallest unit felt to be capable of carrying out the intended function. The Contractor shall supply the equipment and all components and all features that are normally considered to be standard on that Equipment, unless specifically excluded in the Specifications. The price tendered shall include ALL equipment required.

Contractors desiring to quote on equipment which deviates from these Specifications but which they believe to be equivalent from the standpoint of capacity, size, construction, and performance, both as to individual component parts and the completely assembled unit, are requested to submit alternate bids on the Vehicle(s) which so deviates. Any and all Bids submitted will be given due consideration. However, the City will be the sole judge as to the equivalency and its decision will be final.

All equipment offered shall be new and a current standard production unit, excepting as modified by the City's Specifications.

It is a requirement of this Tender document that the completed Specification section must be submitted as part of the Tender submission for evaluation. Failure to submit this completed section of Specifications as part of the Tender submission may deem the Contractor's Tender submission as non-responsive. "Must", "Will", or "Shall": means a minimum requirement that is required to be met or complied with wholly or substantively by a Bid submitted as a response to this RFT as determined by the City in its discretion and determination to advance to further stages of the evaluation process set out in the RFT.
